

# Project Euler #17: Number to Words

This problem is a programming version of [Problem 17](#) from [projecteuler.net](#)

The numbers **1** to **5** written out in words are **One, Two, Three, Four, Five**

First character of each word will be capital letter for example:

**104382426112** is  
**One Hundred Four Billion Three Hundred Eighty Two Million Four Hundred Twenty Six Thousand One Hundred Twelve**

Given a number, you have to write it in words.

## Input Format

The first line contains an integer  $T$ , i.e., number of test cases.

Next  $T$  lines will contain an integer  $N$ .

## Constraints

- $1 \leq T \leq 10$
- $0 \leq N \leq 10^{12}$

## Output Format

Print the values corresponding to each test case.

## Sample Input

```
2
10
17
```

## Sample Output

```
Ten
Seventeen
```

## Explanation

Follow the rules given in statement.
