

Right size the access for your users

Tailor the access of different users to fit your unique, complex workflows

Gain granular control

Adjust 30 entitlements for actions like edit tests, conduct interviews, and send test invites.

Adjust access at the right level

Change entitlements at the role level (company admin, developer, interviewer, or recruiter) or for individual users.

Access that's just right

Give your users the right level of access they need to do their jobs and work effectively in the HackerRank platform.

Customize 30 entitlements across tests, interviews, and more

The screenshot displays a user access configuration interface with the following sections:

- Tests:** View Tests, Edit Tests, Create Tests, View Test Insights, View Test Reports, and Access to Shared Tests (within teams) with radio buttons for No Access, View Access, and Edit Access.
- Interviews:** View Interviews, Create and Edit Interviews, Conduct Interviews, Leave Feedback on Interviews, View Full Interview Reports, and Access to Shared Interviews (within teams) with radio buttons for No Access, View Access, and Edit Access.
- Questions:** View Question Library, Create and Edit Company Questions, View Question Insights, Access All Company Questions, and Access to Shared Questions (within teams) with radio buttons for No Access, View Access, and Edit Access.
- Interview Templates:** View Interview Templates, Create and Edit Interview Templates, and Access All Interview Templates.
- Candidates:** View and Edit Candidates, Access All Candidates, and Access to Shared Candidate Reports (within teams) with radio buttons for No Access, View Access, and Edit Access.
- Company:** Create and Edit Teams, Modify Users, Modify User Role Entitlements, Modify Company Settings, and View Company Insights.

Opt in to flexible user roles today
